

Table of Contents

Volume 26, Issue 8 — August 2019

Research Articles

1.

A Review of Sizing, System Security and Reliability, Controller Design and System Stability of Integrated Renewable Energy Source

Chandra Prakash Varma, Yaduvir Singh

2.

Optimum Scheduling Techniques for Integrated Renewable Energy Source

Chandra Prakash Varma, Yaduvir Singh

3.

Accuracy of conventional and digital methods for obtaining dental impressions and 3D printed models

Caio Cesar Dias Resende, Tiago Augusto Quirino Barbosa, Guilherme Faria Moura, Lucas do Nascimento Tavares, Fabio Antonio Piola Rizzante, Furat George, Gustavo Mendonça, Flavio Domingues das Neves

4.

Mechanical performance of Morse taper implants: finite element analysis and fatigue test

Frederick Khalil Karam, Karla Zancope, Carolina Guimaraes Castro, Rafael Calixto Salatti, Giovanna Chaves Souza Borges, Daniel Jardim Taveira Privado, Guilherme Goncalves da Cruz, Flavio Domingues das Neves

5.

Psychological factor, prime determinant in fast food sale forces

Alexandru Trifu

6.

Combined Use of Genetic Algorithm and Gradient Optimization Methods for Unit Commitment Problem Resolution

Sahbi Marrouchi*1, Souad Chebbi1
